INSTRUCTIONS.

AGAINST each entry will be found a NUMBER, and on turning up this number in the later portion of the book, the House-cusps and Planets' places of the horoscope will be found.

Most of the horoscopes in this book are indexed under the native's surname, and only exceptionally under title or rank, but this rule has not been followed universally. Therefore it is advisable to look for Cardinals, Popes, Princes, etc., under C, P, etc., as well as under christian or surname. Where the native is a Duke, or of Royal blood, look also under dukedom or country. Thus, Nicholas II., Czar of Russia, is indexed under R, the Prince Imperial under P, Rudolf of Austria under A, the Duke of Sforzia under S.

Foreign and Indian names should be looked for under both christian and surname. Possible variations of names should also be borne in mind, *e.g.*, Giulio for Julius, Hieronymus for Jerome, etc., etc. Sometimes a map which cannot be found under one name or title may be indexed under another. For example, the Princess Stephanie of Belgium became the Crown Princess of Austria by marrying the Archduke Rudolf.

For further particulars see Some Explanatory Notes on p. 100.

Long. 76 W.)—*MA* v 89; VIII 400. A very remarkable nativity; owing to the birth-place being *within* the Arctic Circle the Twelfth House cuts a point of the Zodiac posterior and not anterior to that on the Ascendant, and similarly with the other houses, so that the Zodiac *appears* to pass over the houses the reverse way. This figure is calculated according to the method of Regiomontanus described in *Astrology for All* Part II p. 278. The cusps according to the method of Campanus are $\varpi 3\frac{1}{4}$, $\Pi 26\frac{3}{4}$, $\Pi 14$, $\kappa 26\frac{1}{4}$, $\text{♁} 21$, $\text{♄} 9\frac{1}{2}$. These are the cusps, assuming that the cusps of xii xi x ix viii *must* be above horizon. Mr. H. S. Green and some other astrologers consider $\varpi 3\frac{1}{4}$ the cusp not of the tenth house but of the *fourth* and would call the cusps as given those of iv iii ii i xii xi instead of x xi xii i ii iii as given by the calculator. A symposium of astrologers has been invited, see *MA* VIII 400, but the results are not to hand at the time of going to press.

* NOTE.—Cardan has ♃ ♁ 10°, which is probably correct. † Cardan gives M.C. ♃ 14, with Asc. ☿ 28.
† Cardan has ♃ ♄ 17, & ♄ 20: ☿ ♄ 19 in Gauricus is clearly a mistake and has been corrected.
